

Patient Orator

Barrier Breaking Healthcare Communications

Company Overview

Patient Orator is an easy-to-use HIPAA compliant app that bridges communication gaps between individuals and their healthcare providers. Any form of bias or miscommunication in healthcare can be detrimental, resulting in poor healthcare outcomes for patients, lost revenue for healthcare systems, and unnecessary documentation burdens on physicians.

Patient Orator is dedicated to making the flow of clinical and SDOH information as efficient and unbiased as possible. Individuals can use the Patient Orator app to document their healthcare history while verbally or electronically communicating their needs with their provider directly. Patient Orator assists any patient with compromised communication ability and leads to better overall health management.

Patient Orator Technology

- + Patient-Facing App
- + Clinician View
- + Medication Adherence
- + Clinical Data and Information
- + Multilingual for Limited English Proficiency Patients

Engaging Healthcare Shareholders

Individuals

We're here to make telling your health story easier for those that need to hear it while helping you better manage your care.

Social Care

We work with both healthcare and social service organizations to help address health inequities to improve health outcomes.

Caregiver

Stay connected with loved ones, or use our solution to update family caregivers as a health proxy of a loved one.

Academia and Education

Patient Orator's interface and education modules will improve the healthcare literacy of populations and empower them to take ownership of their healthcare journey.

Care Management Team

Patient Orator's tools will improve communication and coordination between patients, their caregivers, and clinical care teams will improve quality of life for patients, and decrease healthcare spending.

Providers

Be proactive in addressing communication barriers such as stereotype threats and health implicit bias.

Health Plans

Patient Orator provides an innovative approach to improving patient outcomes, decreasing healthcare costs, and reducing hospital readmission rates.
